giving your bottle
an absolute touch of class

Bottle wrapping machines VEL-R SERIES

Dimensions and legend

VEL-R SERIES VEL-R

The **VEL-R 1.1500** is a rotary packaging machine composed of an inlet and outlet conveyor belt, a rotating station for bottles handling, a main rotating station that advances the bottles during the packaging phase, the wrapping station and the bows creation station on the upper part and on the bottom of the bottle.

TECHNICAL FEATURES

The VEL-R 1.1500 is equipped with a control panel including:

- SIEMENS S7 PLC
- 12" color touch-screen
- remote support
- drives
- inverters
- all the necessary instrumentation to guarantee the control and safety of the machine.

The machine is installed on a stainless steel structure and is equipped with guards with an anodized aluminum and plexiglass structure; all the sliding openings are equipped with special safety devices as required by the regulations in force.

OPTIONALS

- Bottle format change.
- Conveyor belts for inlet and outlet machine connection.
- Bottle orientator.
- Machine on wheels.
- Industry 4.0 ready.

- **DSSTech** produces innovative automatic machines for wrapping glass bottles for wine, beer, oil and other alimentary liquids.
- Our prerogative is to provide our customers with an «ad hoc solution» that adapts to their marketing choices.
- Each machine has its own standard configuration both in terms of accessories and layout; on request, customer-specific solutions can be introduced.

Series	Model	Bottles/hour **
VEL-R	1.1500	Up to 1500

* The weight of the paper used to wrap the bottle can affect the performance of the VEL-R 1.1500.

** The number of bottles / hour depends on the format and shape of the bottle, as well as on the type of paper used for the wrapping and the accessories and services supplied with the VEL-R. Different types of bottle format must be evaluated in the offer phase.
